JEDI – Joint European Degree label in Engineering

- + Coordination: Universidad Politécnica de Madrid (Spain)
- + April 1st 2023 - March 31st 2024
- + 16 HEI from 11 countries
- + 3 European Universities Alliances and associated partners

Work plan

Goal: Development of a prototype label for joint European degrees

- + **Joint programme:** *integrated curriculum coordinated and offered jointly by different higher education institutions from EHEA countries and leading to a double/multiple degrees or a joint degree.*
- + **Joint degree:** *single document awarded by higher education institutions offering the joint programme and nationally acknowledged as the recognized award of the joint programme.*
- + Development of an integrated European Engineering Education Space
- + Joint European Label Degree: Essentially a testbed experiment
(The label is not a substitute for the current degrees)

Current status:

- + Professions are nationally regulated
- + A huge variety of Double-degree programmes
- + Joint programmes not well recognized
- + Lack of common criteria and rules for the development of joint degrees. Criteria such as:
 - Learning/Graduate outcomes (standardization)
 - Innovative approaches (interdisciplinarity and/or intersectoral components)

Characteristics and challenges:

- + ECTS Number of the joint degree
- + Inflexible curricula programmes
- + Complex recognition beyond countries. The role of national and regional bodies is predominant
- + Project based on collaboration and discussion between academia, education agencies and diverse stakeholders (national and regional levels)
- + Admissions requirements differ depending on countries and institutions
- + Number of semesters may also differ

Advantages:

- + Shared values (e.g. multilingualism, multiculturalism, lifelong-learning, interdisciplinarity)
- + Enhancement of the visibility, attractiveness and reputation of European HEI's
- + Reduction of the job market barriers for engineers (better mobility for professionals within Europe)
- + First steps regarding the future of accreditation of degrees at European level

STYX - EUt+ Status and Structure Experience

+ Coordination: Université de Technologie de Troyes (UTT / EUt+)

+ April 1st 2023 - March 31st 2024

+ 2 associated partners:

+ European Grouping of Territorial Cooperation (EGTC) is a framework

https://ec.europa.eu/regional_policy/policy/cooperation/european-territorial/european-grouping-territorial-cooperation_en

+ The pilots will examine, test and facilitate the use of existing instruments at European level

+  has some experience with EGTC <https://www.eucor-uni.org/de/eucor>

Work Plan

WP1 (UTT)

Project Management,
dissemination
& coordination

WP2 (UPCT)

Sharing processes:
feasibility study

WP3 (h_da)

Setting-up an EGTC
with service focus

h_da

darmstadt university
of applied sciences

EGTC and its advantages

- + Creation of a legal personality (entity) for activities across national borders and designed for public authorities and nonprofit entities
- + Improve the ability to apply for EU programmes and financing funds
- + Approach to the implementation of common interests and activities, e.g. licences, works and services, contract supplies
- + Legally binding decisions and long-term commitment of the partners
- + Easier participation of partners in the decision-making process and involvement
- + Improvement of economic, social and territorial cohesion in the EU promoting territorial cooperation

EGTC strategical advantages for EUt+

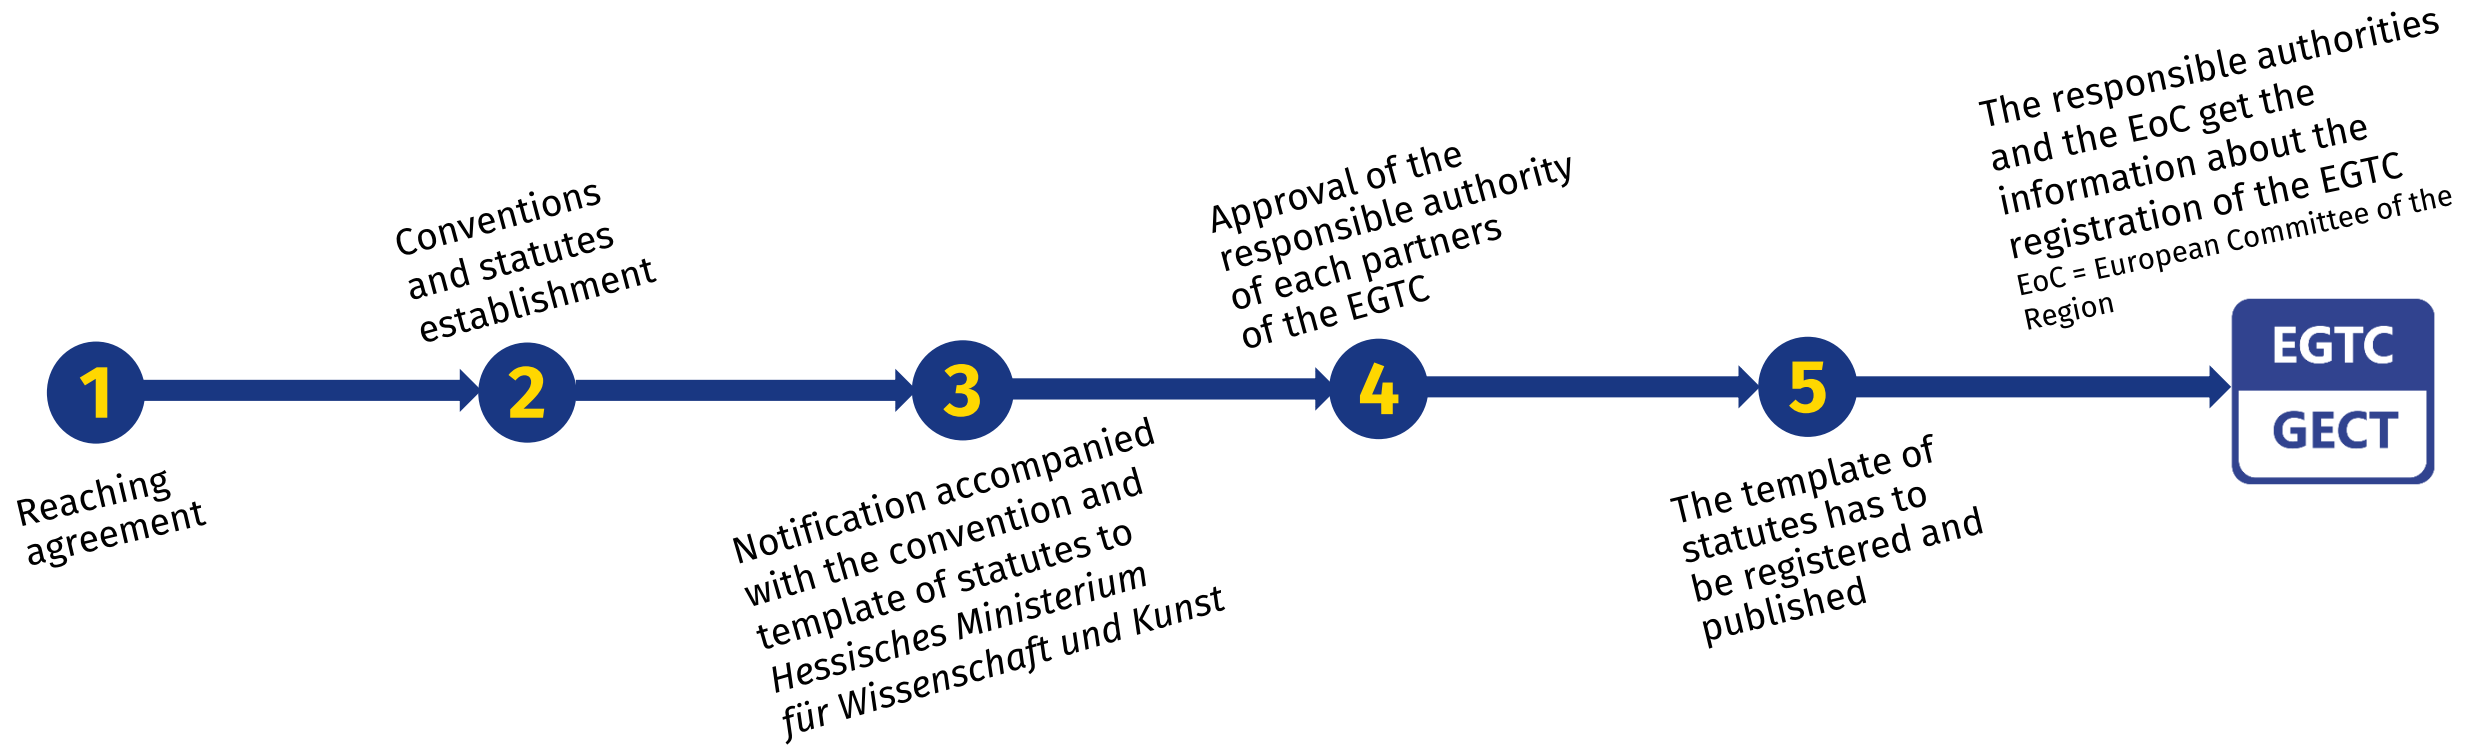

- + Long term commitment of the alliance member
- + Implementation of nation-wide and european strategies
- + Task and ressource transfer between the EGTC members
- + Enabling decision making from a central spot
- + Clear statement regarding transparency in decision making and visibility in EUt+
- + Long term efficient operation

Possible Tasks and Services – Support areas (Education & Research)

- + Mobility maps Implementation
- + Centralized research and education information (apply for calls, grant information, tools, publications, funded projects across EUt+) avoiding overlapping
- + Hosting of various IT-Systems
- + Purchase of licences
- + Managing data, e.g. contact data of students and employees
- + Awarding and recognition of microcredentials
- + Recruitment of staff

Roadmap

**9 PARTNER, 100.000 STUDENTS,
ONE GOAL**

Co-funded by the
Erasmus+ Programme
of the European Union
