

Multimedia Didactics

The Art And Science Of Teaching Host Country Language

TeachME - Objectives:

- To increase the number of young adults who want to learn foreign languages, as well as to immerse into the host country language and culture;
- To establish a European role model: a set of intensive language programs tailored to the needs of youth interested in the study at a foreign university in any of the partner countries;
- To promote transnational cooperation and mutual learning between the partners who represent different sectors of education in order to improve education systems, structures and processes;
- To support exchanges and make visible good practices, dialogue, mutual learning and cooperation among policymakers, practitioners and stakeholders from partner countries.

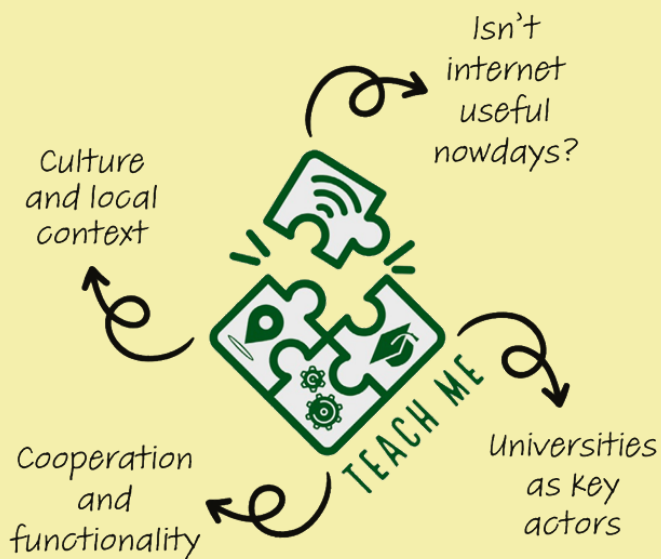

TeachME - Project Results:

- University Roadmap for international students
- A neuro-didactic based intensive teaching of a host country language
- Methods and tools for teaching a language in blended and online courses
- Guide for facilitators of intensive language courses
- TeachME platform with interactive library

What you obtain with the TeachME resources:

- Acquisition of multimedia teaching tools experiences and competencies as well as multicultural and language skills for your professional and personal profile;
- Broadening your teaching repertoire through innovative tools and methods;
- Experience in the European dimension especially for those who will join the piloting and join staff training. Connection and exchange of feedback;
- Improved expertise in language didactics and teaching, cross-sectoral transfer of knowledge, expansion of field-related networks, contact and visibility with stakeholders
