What is research data?

Research data includes **measurement data, laboratory values, audiovisual information, texts, survey or observation data, methodological test procedures and questionnaires. Compilations and simulations** can likewise constitute a key outcome of academic research and are therefore also included under the term research data.

RDM - Definition

Research Data Management (RDM) includes all activities associated with

- processing,
- storage,
- preserving and
- publication

of research data.

RDM accompanies the research process from the initial planning to the archiving, re-use or deletion of the data.

FAIR Data

FAIR data
≠
open data

Findable **A**ccessible **I**nteroperable **R**eusable

Research Data Policy

Describes the guidelines for handling research data

- Institutional ([H-BRS Guidelines for Research Data](#))
- Funder ([DFG Guidelines](#))
- Discipline-specific
- Journal/Publisher

- 
- Project leaders are responsible for a proper RDM along with Good Scientific Practice (GSP)
 - Call for creation of a DMP
 - Assurance of support via H-BRS

<https://creativecommons.org/licenses/by/2.5/dk/deed.en>

Data Management Plan

Contains all information that describes and documents sufficiently the **collection, processing, storage, archiving and publication of research data** within a research project.

Why do I need it?

- provides structure and clarifies responsibilities (GSP)
- some funders request it

Tools

- DMPonline / DMP Tool
- Germany: RDMO (some Universities)
- Data Stewardship Wizard

Some funders provide a form and/or guidelines

**When have I ever
missed order
and/or structure
of my data?**

Source: Oh messy data by Blude on Flickr
CC BY 2.0 DEED <https://creativecommons.org/licenses/by/2.0/>

Order and structure

- Comprehensive names
- Uniform scheme
- Logical structure
- Date for chronological sorting in the following form: YYYYMMDD
- Avoidance of spaces and special characters

Train-the-Trainer Concept on Research Data Management (3.0) [Computer software].

Documented naming conventions or abbreviations, e.g.

[sediment]_[sample]_[instrument]_[YYYYMMDD].csv

[project]_[interview]_[place]_[personID]_[YYYYMMDD].mp4

Storage and backup

Things to think about

- Storage **media**
- Data **location**
- **Who** has access?
- Data **format** (*.csv ↔ *.xls)
- Avoid data waste
- Protection against data loss

Backup 3-2-1 Rule:
3 copies on 2 different media, 1 external

- **unpredictable** situations: fire, storm, flood,...

Source: Flooding of Campus. Photo: H-BRS/Roger Strotmann (2021)

Data publication

Publication paths for research data

1. Addition to a peer-reviewed article ("**enhanced publication**")
2. Independent information object in a **research data repository** (discipline-specific: [Archiving BASIS](#), [Pangaea](#), generic: [ZENODO](#))
3. In **data journals**, the data is only described but not interpreted, - peer reviewed, therefore high quality
https://www.forschungsdaten.org/index.php/Data_Journals

Digital Object Identifier (DOI)
ensures findability

Example:

[10.1000/182](#)

[10.5281/zenodo.7886667](#)

Finding a repository

re3data.org

- Registry of repositories
- Worldwide
- Different disciplines
- Researchers, funders, publishers and institutions
- Many filter options
- Certificates and licences

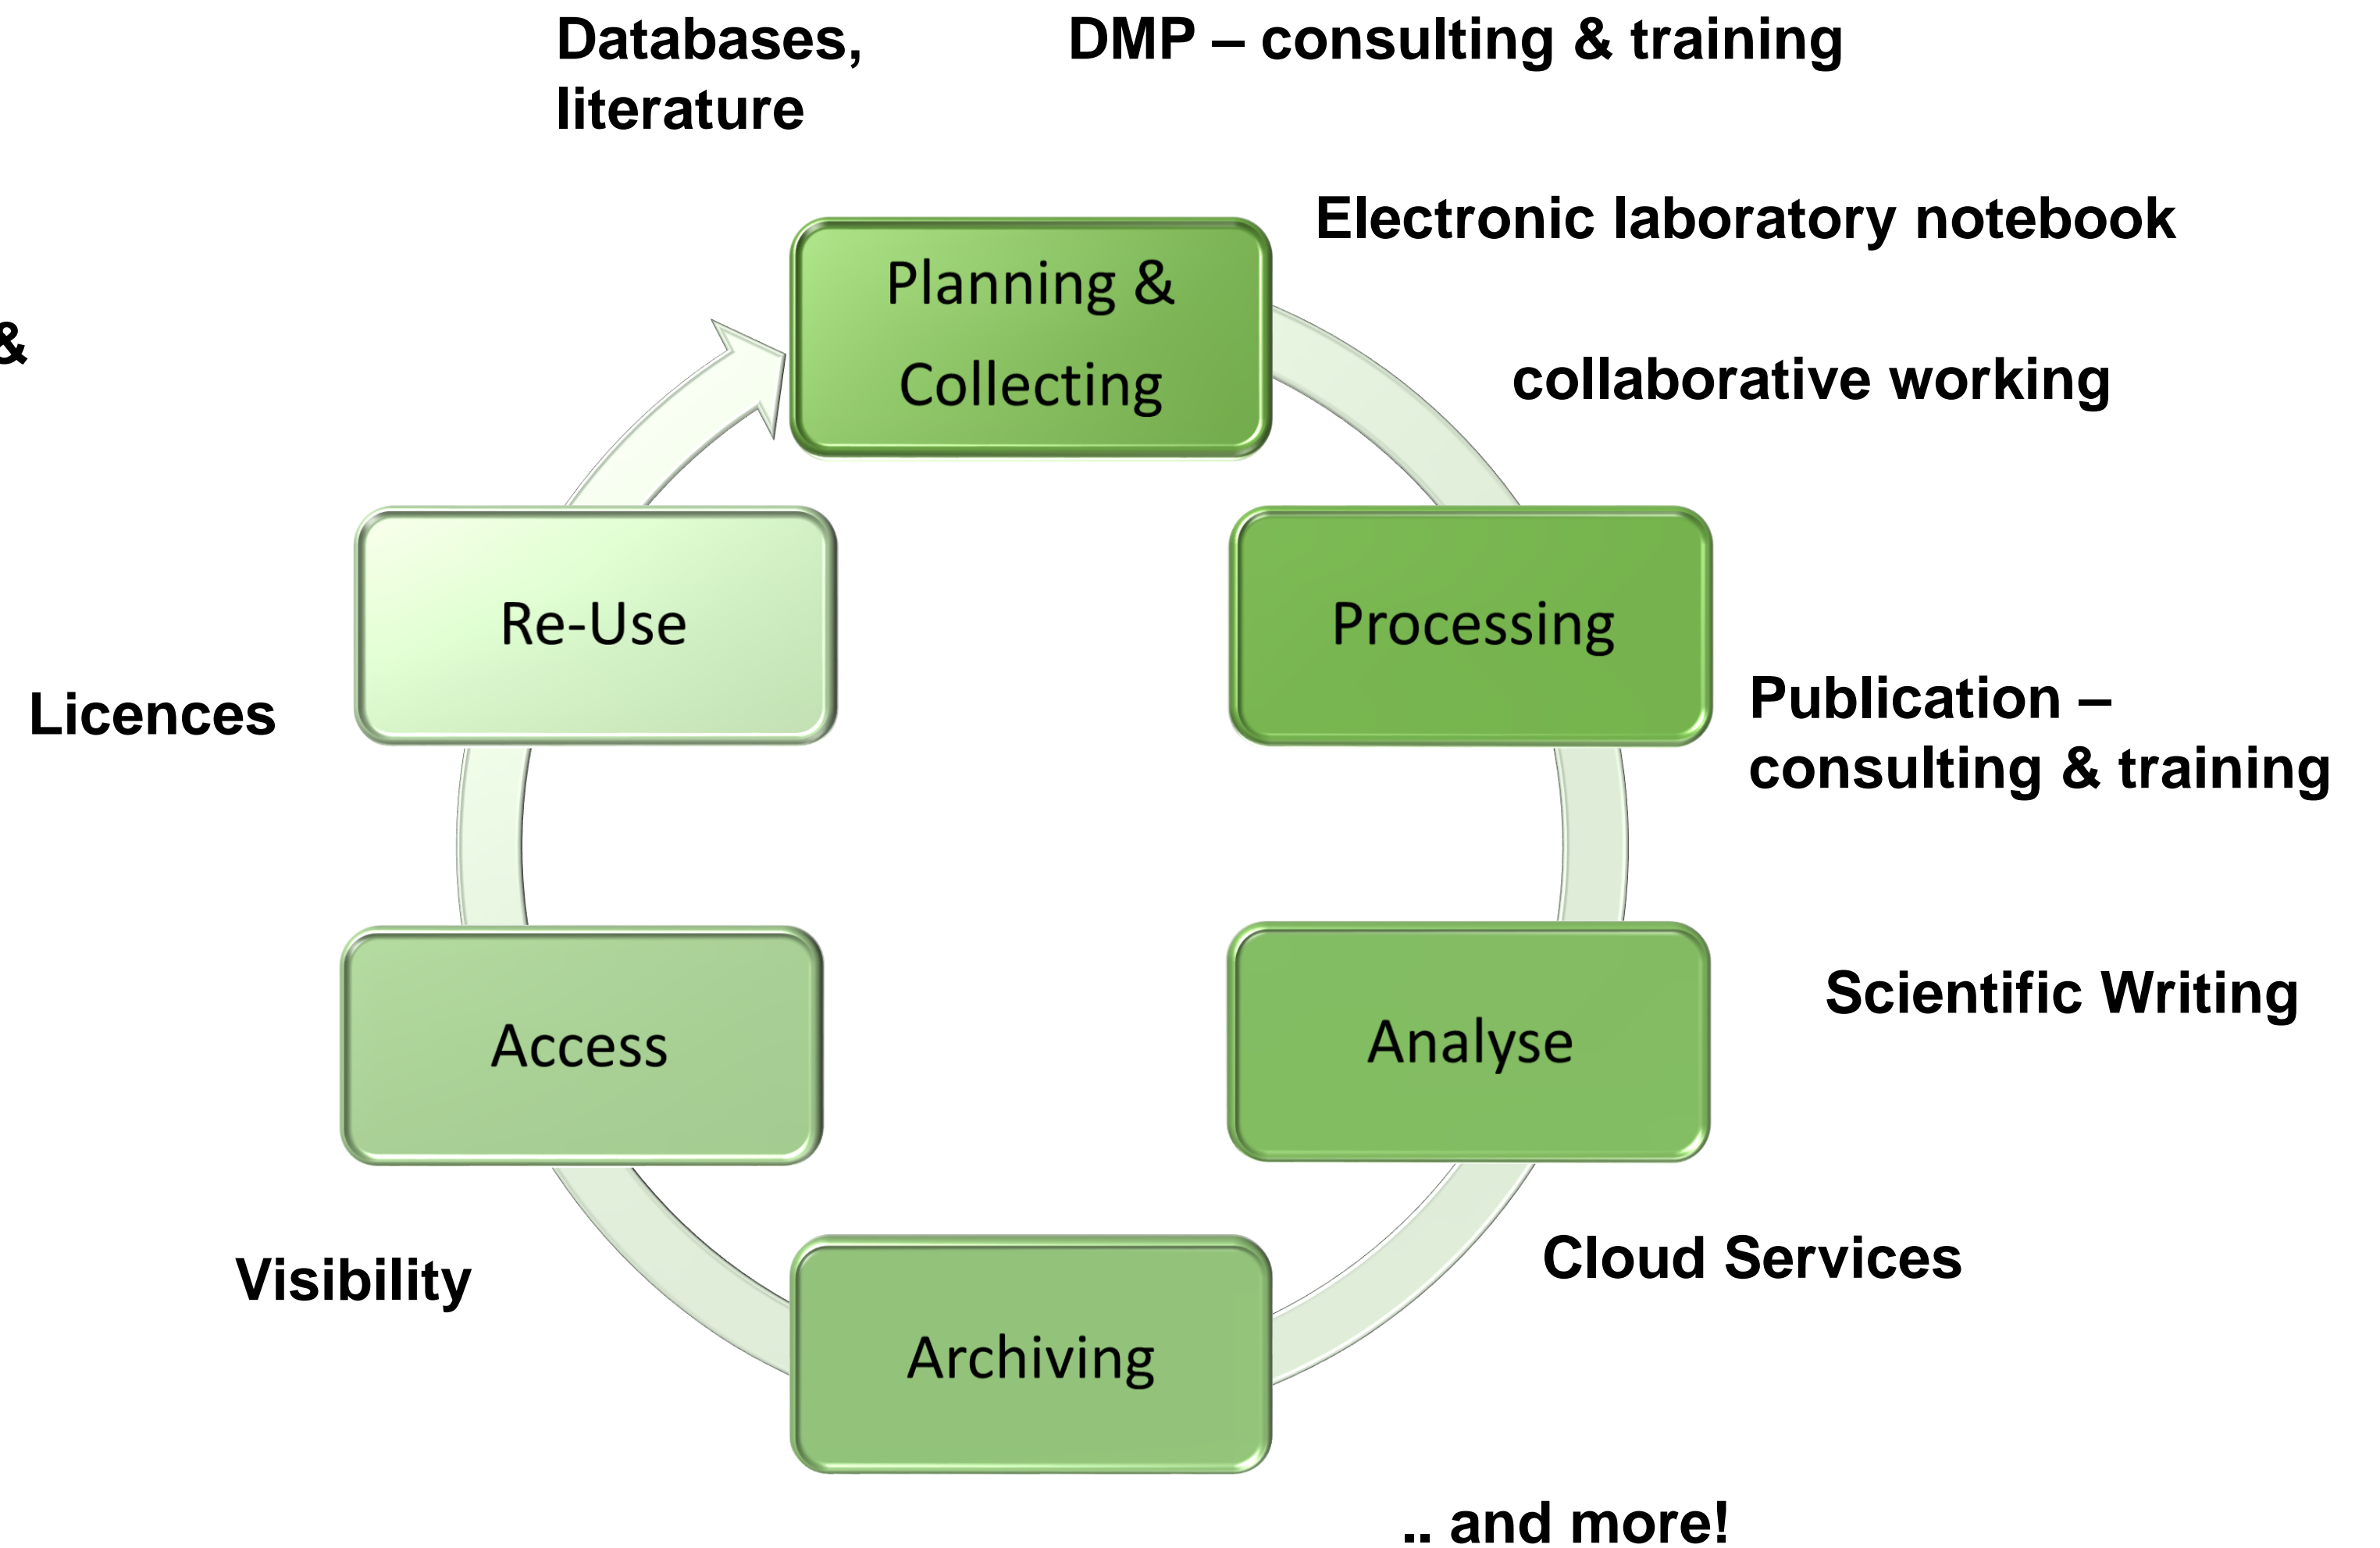

Try it: re3data.org

Where can I find support?

Check your university:

Often, libraries support Research Data Management

Keywords:

- Research Data Management/Service
- FAIR data
- good scientific practice
- data management plan
- repository
- data publication

Germany:
[forschungsdaten.org](https://www.forschungsdaten.org) → search for
FDM-Kontakte

helpful information

EU: e.g. [Science Europe](https://www.science-europe.org),
[European Open Science Cloud](https://www.europeansciencecloud.org),
[OpenAire](https://www.openaire.eu), ...
Germany: [forschungsdaten.info](https://www.forschungsdaten.info)
